KTIM Offline Barcode Entry Ticket Station

The KTIM bar-code entry station was designed to provide a reliable ticket issuing solution for offline parking applications. The ticket data is printed on the tickets "on the fly" allowing for fast and customizable ticket information.

The technology used is a highly reliable direct transfer thermal process supported by an industrialized robust transport mechanism designed for harsh environments.
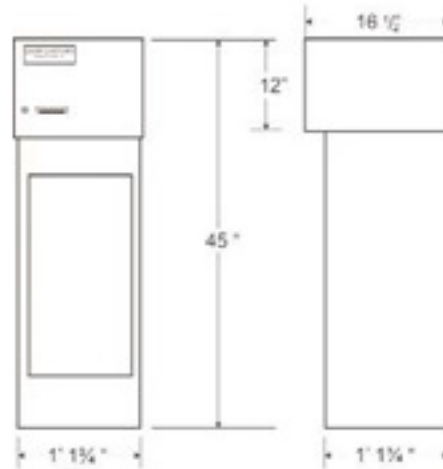

Features:

- Thermal high speed printer
- Ticket issued within .5 seconds
- Customized ticket layouts
- Robust industrialized controller
- 4x20 backlit LCD display
- Ticket low sensor
- Thermostatic controlled heater and fan
- Fully Programmable at the unit without any additional devices
